Analyst

February 2026 - Present

- Serve as the primary point of contact for client and vendor escalations, proactively resolving issues to maintain account satisfaction and retention across a high-volume book of business.
- Independently manages end-to-end post-execution processes across a high-volume book of business with full autonomy.
- Investigate and resolve operational breaks, processing discrepancies, and escalated client issues, maintaining accuracy and compliance across post-execution workflows.
- Operational lead across cross-functional workflows, coordinating directly with directors and senior leadership on process improvements and exception resolution.

Senior Associate

February 2024 - February 2026

- Managed all post-sales transactions across NEISO, ERCOT, NYISO and PJM while maintaining cross-collaboration across different sales/operations teams.
- Managed vendor payment workflows and invoice processing across a high-volume book of business, streamlining exception resolution and reducing turnaround time by 15% year over year.
- Led implementation of a new data management platform and hosted regular client meetings to ensure maximum optimization of the product.
- Served as a go-to resource for junior team members, offering guidance on case management, system navigation, and client communication standards.

Associate

September 2022 - February 2024

- Supported daily client service operations while managing high case intake and post-execution transaction processing.
- Coordinated vendor invoice workflows and issue resolution to ensure timely and accurate payment processing from clients.
- Promoted cross collaboration between the sales and operations teams to support client onboarding and ongoing account servicing.

Projects / Process Improvements

- Implement exception tracking and reporting processes to improve visibility into operational bottlenecks and reduce resolution time across the team.
- Run onboarding and training support for new associates and interns, improving ramp-up consistency.
- Develop workflow guidance and reporting templates to standardize client service operations.
- Support company-wide rollout of new data management platform for post-sales operations.
