Experience

Tradition Energy, Stamford, Connecticut

Analyst

February 2026 - Present

- Serve as the primary escalation point for counterparty and vendor issues, proactively resolving trade breaks, settlement issues and processing discrepancies across a high volume workflow.
- Independently manage end-to-end post-execution workflows with full autonomy across operations supporting 785M+ kWh of weekly electricity volume and 5B+ cubic feet of weekly natural gas transactions.
- Investigate and resolve operational breaks, processing discrepancies, and escalated client issues, maintaining accuracy and compliance across settlement workflows.
- Serve as operational lead across cross-functional workflows, partnering with MDs and senior leadership on process improvements and operational efficiency initiatives.

Senior Associate

February 2024 - February 2026

- Managed all post-sales transactions across NEISO, ERCOT, NYISO and PJM coordinating with internal ops and external counterparties to ensure accurate trade settlement and lifecycle processing.
- Managed vendor payment workflows and invoice processing across a high-volume book of business, streamlining exception resolution and reducing turnaround time by 15% year over year.
- Led implementation of a new data management platform and hosted regular client meetings to ensure maximum optimization of the product.
- Served as a go-to resource for junior team members, offering guidance on case management, system navigation, and client communication standards.

Associate

September 2022 - February 2024

- Supported daily client service operations while managing high case intake and post-execution transaction processing.
- Coordinated vendor invoice workflows and issue resolution to ensure timely and accurate payment processing from clients.
- Promoted cross collaboration between the sales and operations teams to support client onboarding and ongoing account servicing.

Projects / Process Improvements

- Ran point on an exception tracking and reporting process to improve operational pain points and reduced resolution turnarounds strengthening controls across trading workflows.
- Develop workflow guidance and reporting templates to standardize client service operations.
